

EVENT

NATURE WORKSHOP

RAISE AWARENESS AMONGST YOUR EMPLOYEES WITH A MEANINGFUL EVENT

The nature workshops are aimed at Reforest'Action contributors, as part of a global partnership, who wish to mobilise their employees or customers in favour of the forest. Through a half-day event, the participants are made aware of the challenges facing forests and take concrete action in favour of the environment.

RAISING AWARENESS

Lead by the Reforest'Action team and a forestry expert, employees will discover the universe of the forest, its different tree species and numerous benefits, and will learn to observe, in concrete terms, the effects of climate change.

COMING TOGETHER

As a quintessentially recreational spot, the forest is a wonderful playground where your employees can unite around a common meaningful objective: acting together for the local environment. In this way, our nature workshops reinforce group cohesion and help to strengthen team spirit.

TAKE ACTION

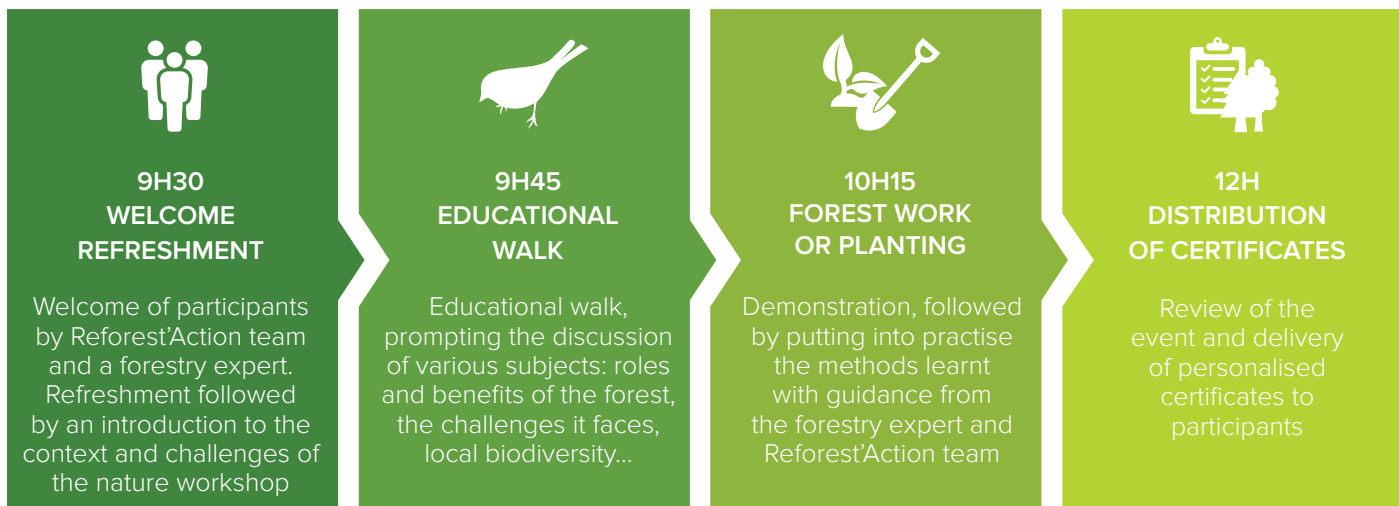

Employees will be introduced to planting and tree regeneration methods and will contribute to the creation or maintenance of a forest, which is a source of ecological services: carbon storage, protection of biodiversity and creation of new local jobs...

REFOREST'ACTION'S SUPPORT

Reforest'Action handles the collection of necessary information from the participating companies, as well as the organisation of the event in connection with their technical partners in the field. From the site-specific research of each nature workshop, to the creation of personalised certificates with your company's colours, our aim is to guarantee that the event lives up to your expectations.

PROPOSED EVENT TIMELINE

These steps are subject to change in order to adapt to the range of activities proposed. Due to its natural environment, this event is weather-dependent.

PRACTICAL INFORMATIONS

Half-day event
(morning or afternoon)

All year
round
