

OFFER

Manager Business Unit - Forest Carbon Sink

Job Description

What if you placed your energy at the service of a positive impact job?

Reforest'Action

As a forest specialist, Reforest'Action is a **B Corp certified company** whose mission is to preserve, restore and create forests in France and throughout the world, **as a response to climate change and the erosion of biodiversity.**

The story of the company began in 2010 when Stéphane Hallaire, President and founder of Reforest'Action travelled to Senegal and participated to a reforestation project. He planted his first tree, a mango tree, and came to realise the extent of the benefits generated by tree planting. Back in France, he quit his job as an engineer and created Reforest'Action. 11 years later: 12 million trees have been planted in 30 countries, 20 million people were sensitised on the importance of the forests, a positive impact generated on the living conditions of more than 150 000 people throughout the world and a team of 50 people, dedicating their energy to the restoration of forest ecosystems.

Our ambition ? Going (much) further, (much) faster.

To succeed, we need to take new talents on board!

To reach its goal of 1 billion trees planted, Reforest'Action creates a department specialized in the development of forest carbon sinks. This new business unit is a strategy for growth that participates to the climatic and environmental emergency in the world, but also responds to the needs of the international voluntary carbon market.
