

# JOB OFFER

## Senior Carbon Officer (H/F)

### The company

Reforest'Action is a social company created in 2010 that works daily to preserve and restore forests in France and around the world. Through a collaborative approach based on the principle of "crowdplanting", citizens and companies can take concrete action in favor of forests by planting trees in rows. The trees are then planted in the field by our technical partners. Each plantation project has a global impact, in favor of the climate and biodiversity, and a local impact, in favor of the socio-economic development of the populations. Reforest'Action has already planted more than 23 million trees, with 400,000 Reforest'Actors and 3,000 companies, and is attracting a growing number of organizations acting within the framework of their CSR strategy or carbon approach.

To reach its goal of 1 billion trees planted in the next 10 years, Reforest'Action is linking its activities to the Voluntary Carbon Market (VCM).

The VCM is a market-based mechanism designed to reap the low-hanging fruits of climate change mitigation. It allows individuals and organizations to finance demonstrated carbon removals at an optimized cost-for-impact. As an industry, the VCM is constantly evolving to remain at the forefront of emission reductions monitoring, while continuously raising the bar in terms of credibility of the credits generated.

The Voluntary Carbon Market is expected to grow 15-fold by 2030 and demand for forest-based carbon credits is already driving the development of our reforestation and forest conservation activities.

### Job description

In this context of fast-growth, Reforest'Action is offering a new opportunity for a Senior Carbon Officer to lead AFOLU project certification under Voluntary Carbon Market standards.

### Main missions and responsibilities

- Assess new project opportunities and conduct feasibility studies, in the prospect of investment from Reforest'Action clients;
- Ensure compliance with VCM standard and methodology requirements at all stages of project development. In particular, train local project partners and ensure operations and processes applied on the field are in line with requirements;
- Ensure timely production and quality of the project documentation, as required as part of the certification cycle;
- Coordinate third-party audits and reviews by the standard;
- Act as a technical referent in meetings with investors and endorse responsibility for progress of certification and credits issuance;
- Build state-of-the-art expertise in a specific field (ARR, REDD+, IFM or Blue Carbon), in a way to become the technical referent within Reforest'Action;
- Support the Carbon Manager in representation of Reforest'Action in events and conferences;
- Provide technical input, collaborate with other teams, including communications, sales, credits procurement, etc.

### Profile

- Rigor, attention to detail
- Excellent written skills
- Fluency in English (level C1) and French is required. Fluency in Spanish or Portuguese would be considered a plus
- Project management: ability to manage multiple large projects under strict deadlines
- Willingness to travel abroad and work on the field when needed (1-2 weeks 1 to 3 times a year)

# JOB OFFER
